CSCI 211x Course Syllabus – Spring 2009
Programming Problem Session
Mon 2:00 – 3:50pm, Ocnl 244
1 Unit Credit / Credit

Facilitator: Paul Weatherby http://www.ecst.csuchico.edu/~paulw
Phone: (925) 642-5623 Email: paulweatherby@gmail.com

Description:
‘Designed to supplement CSCI 112 with additional applications and extended explanations of concepts encountered in programming. Provides the student with the opportunity for additional assistance in basic programming skills.’

This Course will provide students with a broader as well as deeper understanding of programming concepts developed in CSCI 211x. Through group work as well as individual participation, Students will learn how to program easier and more effectively. Students will be provided with in-class programming challenges that will directly corresponding to material in CSCI 211x.

Prerequisites:
Concurrent Enrollment in CSCI 112.

Programming Exercise:
Students are encouraged to attempt the programming problem (if any) at the end/middle of each session. This will be relevant to the material of the week and will be worth the while to complete. Students are encouraged to work in groups to solve these tasks.

Attendance:
50% minimum to Receive Credit or a (C- or better) in CSCI 112.

Grading:
Based on Attendance as well as Participation.

***Note: This is NOT a tutoring Session. This class is designed to Reinforce, Supplement, and Expand the programming Skills of CSCI 112***

***UPE (OCNL 136A) is available for extra tutoring.***

***Subject to Change upon notice (given in class) from me***
